

SMALL SAFETY ISLAND

The Small Safety Island is an excellent place for a swimmer to rest, or a great piece of equipment to teach a child to swim with. There are two height levels available by turning the island over. One height level can be used for sitting adults, and one for standing children. Completely portable, this island can be custom built to your pool depth. Regular sizes available are made for 3, 4 or 5 ft. depths. To be used under competent supervision. The size of the platform is 30" x 26" with a height of either 18" or 26" depending on what your needs are.
